### Hymn of Thanksgiving.

I thank thee, Father, that I live ! I thank thee, for these gifts of thine-For bending skies of heavenly blue,

For this green earth where wild, sweet airs, Like freest spirits jouyous stay-For winding streams, and trees, and flowers,

But more I thank thee for true hearts That bear sweet gifts of love to me, When mine enfolds, and feels that this

Warm from their spririts spreads around An atmosphere serece-divine-Magnetical, like golden haze,

To day I bless thee most for power (It draws me, Father, nearest thee) To love all thine, although they give

In stillness deep, I walk a land Where spirit forms my lootsteps greet, And beauteous thoughts an angel band

I thank thee, Father, that I live! Though waiting fill this earth of thine; To labor for thy suffering ones

And even I, so weak and poor, May hear some word of life from thee; A beam of hope may reach some heart,

#### Farmers and Insanity.

In one of our exchanges we find a late visitor to an Eastern lunatic asylum expressing surprise at the large proportion of farmers among the incane. He says:

"It would naturally be supposed that tilling the soil, and being exposed to the pure, invigorating air, would tend to regulate, instead of to disarrange the balance-wheel of one's intellect."

If we might be permitted a guess on the subject, we would say that the causes of insanity are more frequently physical than mental. A sound mind cannot dwell in an unsound body, and the body must become diseased before the manifestations of mind are disordered. We were once eredibly informed of a case of a woman taken by her husband raving mad to the Columbus In- jar with their accustomed exercise. His driver cane Asylum. The Faculty detained him during the night, extracted one or two rotten teeth from the jaw of the patient, who was thereby so after exhibited any sign of mental derangement. But instances of insanity from apparently slight causes are too numerous to require more than a mention of them.

Now, with all the advantages enjoyed by farmers, of air and exercise, it is notorious to all who have examined the case, that, as a class, use so little fruit and vegetables as regular articles turned out just as he expected. of diet as tarmers. Bread, and meat, and coffee, is the American farmer's diet; and by way of variation, he takes coffee, and meat, and bread : then meat, and bread, and coffee, and so on, from one year's end to the other. When we reflect that it is mostly inconvenient to get a supply of fresh meat, and that therefore salt-and hog meat at that-is in constant use, who should wonder they would go crazy ? Oh yes, there is

food; apples, corn, and potatoes share the same fate, and are required to pass the digestive process of a pig's stomach before being rendered fit ters. The result is a lassitude of mind, often as oke Railroad, is expected to be completed about the swill-barrel; ground, and not a dishful baked for dinner.

## Damages of Brandy Drinking.

In the last number of the Irish Quarterly Review, the weakness of poor Maginn is thus allu-

" He now turned for comfort and inspiration to the foul fiend. Brandy, which has been the cause of misery and death to so many men of genius. We regret the errors of Addison and Steele, we sigh at the recollection of poor Morethe painter, working at his last picture, with the brush in one hand and a glass of brandy in the other, for he had arrived at the terrible condition in which reason could only visit him through intoxication; and Maginn, although not so fallen as this, sunk deeply. The weary hours of lonely watching brought no resource, but that which copious drafts of the liquor could supply. Health was fading away, the brightest years of life were passed forever, and as the dim future lowered, he gazed upon it under the influence of which enthralled the brilliant souls of Addison, of Sheridan, of Charles Lamb, and which sent the once stalwart form of Theodore Hook, a miserable wretched skeleton, to the

Maginn, we know, felt his position. He was neglected by his own party—he was forgotten by many of his former friends, and as we looked upon him in his pittable condition, and compared what we then saw in him with what he have, and as we hoped would have been, we often recalled the learful passage of Charles Lamb:

"When you find a ticklish relish upon your ton gue disposing you to witty sort of conversation esif you find a preternatural flow of ideas e ting in upon the sight of a bottle and fresh g'ass s, avoid giving way to it as you would fly our greatest destruction. ### Encountering the Elephant.

A correspondent of the Baltimore Patriot, writing from Athens county, Ohio, on the 17th inst., relates the following:

"I have just been wandering about the country in search of land belonging to some clients of mine, and in doing so have met with many amusing incidents. Only the other day, as a caravan of rare animals including one that travelled with a trunk, was passing up, not Federal Hill, but Federal Creek, in Athens county, Ohio, it encountered a sturdy Buckeye, driving a large buil. Now this bull, unlike some people, had never seen 'the elephant' before, and when the 'critter' came in sight commenced making his fore feet marks in explanation of his views, reflect much familiar with the 'freesoil,' and his lungs familiand owner warned Barnum's agent to get his elsaid he would risk his elephant if Buckeye would risk his buil. Whereupon the Western Taurus much tranquillized that the second day she re-turned with her husband to her home, and never lunge at the huge monster of India. The contest was somewhat similar to certain political ones, for the elephant with one blow from his trunk stretched the bull upon the ground, breaking three of his ros and driving his breath so far with Mr. Bull's beef, tallow, and bide, whilst the ling and whiling attendant. ### TREASURER'S REPORT.

We have before us the Report of Mr. Treasurer Courts, made to the present Legislature. for the fiscal year ending November 1st, 1852. We regret our lack of space to present this Report in but we give, as follows, the aggregate of re-

ceipts and disbursements.

The sum of receipts into the Treasury from 1851, was \$285,154 79; and the sum of receipts for the year ending October 31st, 1852, was \$366.728 88—making for the two past years, \$651.883 67. The sum total of disbursements for the first year was \$366.342 76; and for the last year, \$249.254 45—leaving balance in hands of the Public Treasurer on the 1st of November,

The Treasurer goes into an estimate of the receipts into the Treasury for the next two fiscal years; and also of the disbursements. The aggregate receipts are estimated at \$464,714 92. ursements at \$451,688 20, leaving balance in favor of receipts of \$13,026 72.

This Report is clear in its statements and well arranged; and the details of receipts and expen ottures, as presented by the Treasurer, as well as his estimates for the next years, and his relow, at length, the remarks Courts concludes his Report:

" In order to a clear understanding of a portion of the items which enter into the foregoing estimates, some explanation is necessary. In the first place, I have put down only that portion of the tax, collected by Sheriffs, which belongs to the Public Fund. The tavern tax collected by them, is one of the numerous sources of the Literary Fund, none of which belong to this list, because the receipts into it are distributed as fast as from his body that it utterly refused to return. they accumulate for the benefit of the Common Schools of the State. It is proper to remark. that the receipts into this fund are now being much increased by dividends from the Wilmington and Raleigh Railroad Company. By an Act of the General Assembly of January 27th, 1840, the Treasurer was authorised to advance to the Seaboard and Roanoke Railroad to form a connection between that Rail cessary, to form a connection between that Rail road and the Raleigh and Gaston Railroad, when ever the Seaboard and Roanoke Railroad Com pany should subscribe and expend the other half, and for this purpose the Treasurer was author issue bonds or to advance the mon

ey from the Treasury.
On the 9th of October last, regarding the con dition as having been complied with, I advance from the Treasury \$15,000.

I preferred advancing the amount from the Treasury at the time, rather than issuing bonds, because of the large amount then standing to my estimates to return that amount again to th freasury, when, from its condition, it shall become necessary to issue bonds on account of the appropriation for this work. It is supposed that whole amount the State will have to advance for this purpose, is \$75,000.

So, by the fifty-first section of the same

the Treasurer is authorised, when certain specified conditions are complied with, to advance, eithe Treasury, \$65,000, for the improvement of

Neuse and Tar Rivers.
Under this section, I have advanced, upon the warrants of the Governor, \$12,411 33, on account of the Neuse river.

This amount it is proposed also to return to the Treasury, upon the sale of State bonds for this appropriation. My reason for adopting this course was, that while I did not suppose the Legislature expected so large an amount as the whole of these two appropriations to be advanced from the means in the Trasury, I, at the same time, did not suppose they expected the Treasurer to issue bonds and pay interest on them so long as

that bonds for these two sums of \$75,000 and \$65,000, as also of \$500,000 for the North Carolma Railroad, will be issued on the 1st of January next, and \$500,000 for the latter object, six months, until 2,000,000 are issued for and interest is calculated on them accordingly ; but this is done more out of safety, than fro I have estimated the premium on these State

bonds proposed to be sold, at the average rate at which I have sold the bonds that have been issued since I came into this office; but the ant of premiums that will in the end be obtained on them, will, I feel confident, depend very much upon the action of this Legislature in relation to the form of bonds to be issued, and also upon the point at which it shall be finally agreed to pay them, principal and interest. heretofore used is adhered to-and the Treasurer has certainly no power to change itfor the act above mentioned, under which these issues are all to be made, expressly adopts the present form—then I think the large amount which we shall throw into the market will depress them below the rate here set down. Because, for such an amount, we must look mainly to bidders from abroad, as it hardly can be sup posed that there is unemployed capital enough the State to absorb them; and this form will not suit that description of bidders for the following reasons: Ours are what are called " Registered," as contra-distinguished from " Coupon The Acts of Assembly, under which they are issued, require, in every case in which one of them is transferred after the first issue, that the party transferring it shall come to this office himself, or send an agent, with a power of attorney, to have the transfer entered books of the office; and the Treasurer, after cancelling the old bond, issues a new one to the purwhich is semi-annually, it is the duty of the holder of the bond to give a receipt himself on the books of the uttice, or to do so by an agent, properly constituted as above.

And I have also excluded that portion of that, while they render them not so desirable, ethe tax collected by sheriffs for the Lunatic Asy- ven for a home market, they constitute so serious fum. The State now owns \$1201000; that is three-fifths of the stock in it. This coad is paying a handsome dividend into the Treasury.

the Assembly, will increase for a time, very much, the labors of this office, but will, I think, in the end greatly simplify this branch of it.

It is to be borne in mind that these estimates are, of course, confined to the two fiscal years

commencing first November, 1852, and ending 31st October, 1854, and yet it is important that this Legislature should be able to form, as far as of the receipts and disbursements for the fisca year commencing the 1st November, 1854, and ending the 31st October, 1855; because, if the calls upon the Treasury for that year are expecthey prefer to do so, make provision by increaswhereas, if this duty is devolved upon the next Assembly, no tax bill passed by them, under our system of laying the tax one year, and collecting it the next, can take effect soon enough to increase the revenue of that year. It is therefore proper to remark, that there will have be paid in that year, \$45,000 more, by way of interest or the State bonds, for the North Carolina Railroad than there will be for that purpose in 1854.— While the only probable increase of the revenue of that year, over that of 1854, would seem to be promised by our public works. What that increase will be, it is, in the present incomplete state of most of them, difficult to estimate with any reliable approach to accuracy. In case any additional appropriations are made by this General Assembly. I hope I shall be pardoned for recommending that provision be made to meet them by an increase of the revenue of the State, unt of the important bearing it may have upon the credit of the State bonds capitalists, especially those residing out of the State, will examine with scrutiny into the State's resources, and will not fail to enquire whither money to pay interest, which is the mere ex change of one creditor for another, or to prevent by taxation, the accumulation, from year to year, issue bonds and pay interest on them so long as by taxation, the accumulation, from year to year to year to the condition of the Treasury would enable him to meet calls for a portion of these appropriations.

Still, I suppose you will deem it advisable, in order to provide for every contingency, and to preserve, in any event, the credit of the State, to give the Treasurer the usual authority to raise money, either by issuing bonds or otherwise, not exceeding a certain a mount, to meet any lawful demands upon the I have not included, in the list of estimated

From this list, you will perceive that the debt of the State on which she is now paying interest, was, on the Ist of Nov. 1852, \$1,228,-235 14. And, from the same list, you will discover that the additional amount of debt authorized to be contracted under existing laws, is \$2,

into the office in January 1851. \$60,000 of State bonds, to pay off the balance of the State's subscription to the Fayetteville and Western Plank Road Company. And, also, \$170,000 to meet the liabilities of the State generally. And, on the other hand, it will also be seen from the tabular statement, that, besides discharging the ordinary expenses of the State, including the interest debt, the sum of \$101,000 of the principal of her debt has been paid off, including \$40,000 to the bank of Cape Fear, while a large amount has also been advanced in aid of some of the works in which she is engaged, to-wit: The navigation of the Cape Fear and Deep Rivthe construction of the Weldon and Gaston Railroad, the Geological survey of the State, turnpike roads, the navigation of the Neuse Riv-er, &c. These bonds were all advertised, inviing sealed proposals, and after the time for advertising had expired, the bids were opened in the presence of the Comptroller of the State and other gentlemen, and a record made of the whole proceeding, to which the attention of the Committee of Finance is invited. On each of the bonds sold, a premium was obtained, amounting in the aggregate, to \$4,121 19.

I discovered upon my first sale of some bonds for the construction of the Plank Road in April. the other acts authorizing the issuing of State of these bonds. I recommend, therefore, that this act be so amended as to be made to conform to the other acts in this particular, for if the privchange them as recommended in a forhink proper to avail themselves of it.

SATURDAY, DECEMBER 18, 1852.

N. C. Railroad -- State's Subscription. The Directors of the Railroad met in Raleigh on the 8th. We learn from the Raleigh papers that the certificate of the Treasurer of the Company was laid before the Board of Internal Improvements, showing that the subscribers to the work had jaid in \$513,845, something more than the amount required by the charter; where upon the Board subscribed, on the part of the State, two millions of dollars. Five hundred thousand dollars are, therefore, now due by the State on her subscription; but we learn that only one hundred thousand dollars will be asked for at this time, and the Legislature will be applied Treasury, so as to give the Treasurer time to dispose of State bonds-the amount thus approprinted to be refunded, of course, to the Treasury, us soon as the bonds are sold.

A message from Gov. Reid was read in the two Houses on the 10th, stating the above facts, and recommending the Legislature to take steps for the compliance of the State contract provided State Directors.

The laying of the track will probably commence soon after the beginning of February, and within the next twelve months the whole line from that count to Raleigh is expected to be in operation.

TURNPIKE .- A meeting held at Danbury, the county-seat of Stokes, the 4th inst., resolved to memorialize the Legislature on the subject of a Turnpike Road, from the State line of Virginia, connecting with the Taylorsville turnpike, to Salem, N. C., by way of Danbury and Walnut Cove. Those people need a good road, and we can see no good reason for the State's withholding any judicious aid from such enterprise.

Sundry amendments were from time to to, to appropriate this sum immediately from the time offered, and the bill was ably debated on the 8th and 9th. The \$500,000 for Nag's Head was, on motion of Mr. Joyner, stricken out. A motion by Mr. Boyd appropriating \$500,000 for a Railroad from Danville to Greensborough was rejected. The bill lies on the table.

## DEATHER BANDS:

THE subscriber has put up machinery for stretching, cementing and riveting bands with copper rives. The bands are stretched with powerful machines, made expressly for that purpose, and the difficulty of bands stretching and ripping under the common way of making them, is entirely removed by this process. Bands loade in this way will hold their width evenly, run true, and have a uniform bearing on the drum or pulley, and will give from 15 to 20 per cent, more power that those made in the ordinary way. They are made out of the best selected oak tenned Spanish I eather, and no pains will be spared to make them equal to the best Nortkern bands, and will be sold as low as they can be bought in New York.

New York and Virginia .- The Richmond Whig publishes statistical tables showing the ex-tent of the foreign trade of Virginia, compared

with New York, on which it remarks:

"The above tables show that Virginia has regularly decreased, while New York has increased." ed. Thus the import trade of New York has gradually increased from about \$840,000 in 1769. and from three millions of dollars in 1791, to the enormous sum of fifty-seven millions of dollars in 1852! while Virginia has fallen off in her import trade from two and a half millions of dol-lars in 1791, to \$375,000 in 1829, \$550,000 in 1832-not a great deal more than the freight of half a dozen of ships."

It is too much the habit both with our people at home and abroad to depreciate the productivepursued by our planters at the South. This is unjust and undeserved. Mr. Solon Robinson, the itinerant amateur farmer of New England, who visited in person nearly every farm of any note from Maine to Florida, informed us a few years since that the wheat plantations on James River excelled in culture and production any that he had seen in all his journeyings through the country, and that the immense corn fields on the Roanoke and Lake Scuppernong, in North Car-olina, surpassed any thing he had imagined in the cultivation of that staple.—Petersburg Int.

Scramble for the Spoils .- The scramble for the local appointments is already begun in the Loco Foco camp; and if all we hear be true, there will be some funny scenes by and by, when the present incumbents vacate their places. So far as the Federal officers are concerned, the understanding is that the Old Hunkers are making a determined effort to keep the Barnburners as way from the spoils as a punishment for their opposition to Gen. Cass. 4 years since. But the Van Burenites, who are voraciously hungry, it scenis, have scented the game, and are getting to work to counteract it, if they can .- N. F.

During the progress of the debate in the House of Commons, on Saturday, it was quite amutions that were indulged, by those " Democratic" gentlemen who participated in the discussion, as to the probable policy of the incoming Adminis-tration with respect to the Public Lands. Can Mr. Pierce fulfil all that was then and there "expected " of him? is the question. No more than he can satisfy the Abolitionists of the North and the Secessionists of the South, by whose combined votes he was elevated to the Presideney is the answer!-Register.

Mormon Missions .- By the proceedings of the Mormon Conference, it appears that the following number of missionaries have been sent to the places named, viz: - To England, 37; Ireland, 2; Wales, 3; France, 1; Germany, 4; capital of Prussia, 3; Norway, 2; Denmark, 1; Gibralter, 2; Hindoostan, 9; Siam, 2; Chi-na, 3; Cape of Good Hope, 3; Nova Scotia and British Provinces. 4; West Indies, 4; Brit-ish Guiana, 2; Texas, 3; New Orleans, 1; St. Louis, 1; Iowa, 1; Washington city, 1; Australia, 9; Sandwich Islands, 9.

Then and Now .- Fifty years ago steamboats were unknown; now there are 3,000 affont on American waters alone. In 1800 there was not single railroad in the world; now there are 10, 000 miles in the United States, and about 22,-900 in America and England. Half a century sgo it took some weeks to convey news from Vashington to New Orleans; now not as many as it then did weeks. Fifty years agthe most rapid printing press was we hand power; now steam prints 20,000 papers hence,-Cleveland Herald.

neeful servant of God, the Rev. John McIntyre, rested from his labors on the 17th instant, at the residence of his son-in-law, Mr. Alexander Purcell, in Robinson, North Carolina, in the one hundred and third year of his age. It is comparatively seldom that we hear of a minister of the gospel reaching his three-score and ten; but here was a venerable man of God who had been spared to wear the harness for more than a century.

For Liberia .- The Languager (South Carolina) Ledger says some little excitement was exbibited in that town on Friday week, occasioned by the departure of some thirty free negroes for Liberia. They comprised five families, all of Laberia. They comprised five families, all of Lancaster district, and will be shipped from Wilmington, (North Carolina) by the Colonization

The advance in the price of tren in England is being felt here. The "Montour" Works in Pennsylvania have just made a contract with the Pennsylvania Central railroad for 20,000 tons. at \$55 per ton. Other contracts will doubtless made in this country if the present prices shall continue, for they will pay.

The Jesuits have again taken possession Loyola their ancient seat in Spain. Fifty or sixty fathers of the order will reside there in charge of the missions in the kingdom. The or-der has six houses in Spain, but no college for the instruction of youth.

Darius Davidson, of New York, proposes to build a leviathan steamship, seven hundred feet long, with sixteen engines of three thousand horse power each, calculated to carry three thousand passengers, and to cross the Atlantic in five days.

War and Property .- In these "fillibustering" times, when there is more of a belligerent spirit spreading than sober, peaceful citizens may im-agine, the New York Express does well to remind people that during the last war with England, property fell in that city 40 per cent., and its population was diminished 25,000.

Astronomical Discovery .- The new monste elescope of the Rev. Mr. Craig, in England, has revealed the fact, that what was supposed to be Saturn's rings, are not rings at all, but, in reality, arches of the most perfect geometrical forma-

Advance in Iron .- Some of our iron men. says the Pittsburgh (Pa.) Post, have made "independent fortunes" by the recent rise in pig metal. We have heard of gendemen who have made, by the advance, \$25,000, others \$50,000, others \$100,000, others \$150,000, and so on.

The Mormons .- A writer at Salt Lake, addressing the St. Louis Intelligencer, says fully one-third, and perhaps one-half of the Mormon community are English, while of the American population, by far the greater number come from New York, and the other Middle and Eastern w York, and the other Middle and Eastern States.

A Good Answer .- When the Rev. Jesse Lee, the father of Methodism in New England, was asked why there were no doctors of di-inity in his denomination, he promptly replied, "Be-cause our divinity is not sick."

In opening a bale of cotton recently at Cincin nati, the body of a negro was found pressed into it, and so great was the pressure that the body of the man was not more than three inches thick.

The Post Office Business .- Over ninety-three millions of letters passed through the post offices of the United States during the last fiscal year. The revenue under the reduced rates of postage has fallen off nearly a million of dollars.

A railway-train travels seventy miles an hour which may be called one hundred and five feet per second, and this rate is little more than four times less than that of a cannon ball when discharged.

Methodist Episcopal Church South.—The increase in the Church South, since the division in 1844, has been about 90,000, or about 12,000 a year. The total membership in the Church, North and South, is now 1,260,000.

Of all the numerous realicines extant, (and some of them valuable) for the cure of pulmonary complaints, nothing has ever been found which could compare in its effects with this Preparation. Others cure sometimes, but at all times and in all diseases of the lungs and throat where medicine can give relief, this will do it. It is pleasant to take, and perfectly safe in accordance with the directions. We do not advertise for the information of those who have tried it but those who have not.
