Cramps, Colic, Croup, Coughs, Tooth-ache,

Diarrhea, Dysentery, and all Bowel Complaints.

A Safe, Safe, Quick Cure for these troubles is

Pain-Killer

It is the trusted friend of the Mechanic, Farmer, Planter, Sailor, and in fact all classes. Used internally or externally.

Beware of imitations. Take note that the genuine "PAIN-KILLER" is sold everywhere.

25c. and 50c. bottles.

LIFE IS TOO SHORT.

Life is too short for any vain regretting. Let dead delight bury its dead, I say. And let us go upon our way forgetting the joys and sorrows of each yesterday. Between the swift sun's rising and its setting. We have no time for useless tears or fretting. Life is too short. Life is too short for any bitter feeling; Time is the best avenger if we wait. The years speed by, and on their wings bear healing. We have no room for anything like hate. This solemn truth the low mounds seem revealing. That thick and fast about our feet are stealing. Life is too short. Life is too short for aught but high endeavor. Too short for spite but long enough for love. And love lives on forever and forever. It links the worlds that circle above; It links the first law, the universe's lever. In its vast realm the radiant soul sighs never. Life is too short.

ELLA WHEELER.

TELEGRAPHY WITHOUT WIRES.
Tesla, the Electrician, has Succeeded in Transmitting Messages Through the Earth—May Talk With the Stars.

Tesla has taken another step in the accomplishment of the "impossible." He has succeeded, at last, in holding telegraphic communication without the aid of wires. This, the fruit of years of toil and study, is the most startling and most important contribution yet made to electrical science. If Tesla lives, as he has hope and likelihood of doing, to the extreme limit of intellectual activity, and if he continues during his remaining years the rate of progress already attained in scientific accomplishment, his old age will see distance annihilated.

Electricity will, within the next half century, be set wholly free from the trammel of wires, and force, as well as intelligence, be transmitted from one point of the globe to another with the electricity which during all the ages the gray old world has harbored within itself.

The thing has been done. The theory upon which Tesla has been working through toilsome years has, in secret, been proven true, and the discovery puts him for the time at the head of the whole army of electrical investigators.

ANNOUNCES HIS SUCCESS.
Concerning the minute details of the means which he has employed to reach the result so long striven for, the inventor is secretive. It is his way. Ever since his first appearance on the stage of electrical invention Tesla has worked in secret and omitted the blowing of his own trumpet. Now he merely announces that he has succeeded in telegraphing over a limited distance without the aid of wires.

But he does not hesitate to declare that ultimately by means of his system, communication may be perfected across any space what soever, and the nations of the world brought into perfect union so far as the interchange of thought is concerned.

He goes even further. He says that power, too, may be transmitted, and, modestly barring the presence of the incredulous, that some time before the judgment the people of earth may be communing with the inhabitants of other worlds, only utilizing the currents which the universe has up to this time kept secret.

This is not a new or an accidental discovery in any sense, as was that of the law of gravitation by Newton. It is an idea in which Tesla has for many years reposed implicit faith, and which he has wrought at with slavish industry.

Years ago, smothering the fear which he afterward admitted had possessed him, of being laughed at by scientific men for his audacity, and dubbed a Jules Verne for his flight of imagination, Tesla proclaimed, at a gathering of scientists, his theory and his belief in it. He said:

HIS PLAN CONCEIVED YEARS AGO.
"In connection with resonance, effects and the problem of transmission of energy over a single conductor, I would say a few words on a problem which constantly fills my thoughts and which concerns the welfare of all. I mean the transmission of intelligible signals, or, perhaps, even power, to any distance without the use of wires. I am daily becoming more convinced of the practicability of the scheme, and, though I know full well the majority of scientific men will not believe that such results can be practically and immediately realized, I think that all consider the developments of recent years by a number of workers to have been such as to encourage thought and experiment in this direction.

"My conviction has grown so strong that I no longer look upon this plan of energy or intelligence transmission as a mere theoretical possibility, but as a serious problem in electrical engineering which must be carried out some day. The idea of transmitting intelligence without wire is the natural outcome of the most recent results of electrical investigations. Some enthusiasts have expressed their belief that telephoning to any distance by induction through the air is possible. I cannot stetch my imagination so far, but I do firmly believe that it is practicable to disturb, by means of powerful

ditions of the earth, and thus transmit intelligible signals and perhaps power.

DISTANCE AMOUNTS TO NOTHING.
"In fact, what is there against the carrying out of such a scheme? We now know that electric vibration may be transmitted through a single conductor. Why, then, not try to avail ourselves of the earth for this purpose? "We need not be frightened by the idea of distance. To the weary wanderer counting the mile posts the earth may appear very large; but to that happiest of all men, the astronomer, who gazes at the heavens, and by their standard judges the magnitude of our globe, it appears very small. And so I think it must seem to the electrician; for when he considers the speed with which an electric disturbance is propagated through the earth all his ideas of distance must vanish."

It was in that spirit that Tesla set at work upon the task over which he has now triumphed. The "powerful machine" which he needed he invented. It at once took place in the electrical world and was known as "Tesla's oscillator."

"Now," said Mr. Tesla to a Journal reporter, "I have devised machines which will transmit messages through the earth for upward of twenty miles. I have given them many practical tests. I have both given and received intelligible communications with them, and I have no hesitation in saying that they solve the problem which I started out to solve.

"They are, of course, rudimentary, but I shall begin at once the construction of other apparatus which will still further do away with the obstacle of distance, and enable me to hold intercourse with any part of the globe. An apparatus can only be judged by what it will do, but if this machine will conduct sound through the earth for a distance of twenty miles there is no insuperable obstacle to prevent that distance from being ultimately multiplied to a seemingly infinite degree.

HAS OBTAINED ENORMOUS POWER.
"When Professor Helmholtz, after hearing my theory, said it was possible, but would require enormous power, I was vastly pleased, because, though I did not inform him of it, I had already overcome that difficulty."

Tesla's "oscillator" has been devised specially with a view to the solution of this his pet problem. The laymen need only know, in relation to this marvelous machine, that the multiplied interruption and restoration of a simple electric current multiplies its power. This interruption had been accomplished only by limited appliances until Tesla perfected the oscillator; perfected it to a degree where the current could be interrupted many million times in a second.

"The static electricity of the earth," said Mr. Tesla, "can be set in motion, and what was necessary to effect telegraphic communication in accordance with this system was to devise a machine which would catch and record these disturbances. These machines I have at last secured."

What manner of devices these are with which he has thus bound the earth to his service, the scientific magician will not say. The magnitude of the discovery and its importance in the doings of the world, he realizes keenly. "It will," he said, "bring the nations closer together. The perfection of the system will not, as people are so prone to imagine, necessarily do away with the use of wires for telegraphic communication, but for the dissemination of general information, rather than private communication, they will be useful.

"But will not the utilization of the earth's electricity by one of these systems or lines prevent the operation of any other machine at the same time? Will not the communications of different systems be jumbled and confused?"

GRAVE CITIES BROUGHT TOGETHER.
"No. Any number of them might be in use without one interfering with another. Their chief usefulness would, however, be attained by maintaining them in all great cities, and having the news of universal interest sent out at stated intervals, and received and distributed to all quarters of the world at the same moment. Commercial and political knowledge can thus be infinitely lessened, if not done away with altogether.

And now that Tesla has progressed thus far in the solution of the problem of universal communication he finds new and astounding possibilities spread out before him; things now appear within reach which, when he began experiments to this end, seemed like the wildest of dreams.

"I thought once," he said, "that if sounds could ever be conveyed in this manner that would be all, perhaps, that science might have ground to hope for. I am convinced now that such is not the case. I conceive it entirely possible to transmit power from one part of the globe to another by the same system."

MAY YET TALK WITH THE STARS.
"And as for holding communication with the other planets?"

"I will say this," said the magician; "if there is ever established a system of intercourse with other worlds it will be by this means."

One of the best known men in the advanced guard of electrical scientists said yesterday, when told of Tesla's announcement, "I am not surprised at this. I was at one time thoroughly acquainted with

the line of this discovery, but of late years scientists have generally, I think, conceded that his theory as expounded before the National Electric Light Association some years ago, was a thoroughly correct one, and the one upon which the results would finally be obtained if they were to be obtained at all.

Death of Niagara Falls.

Fifteen hundred years ago the terrestrial movements raised the Johnson barrier to the Erie basin so high that the waters of that lake reached not merely the level of Lake Michigan, but the point of turning all the water of the upper lakes into the Mississippi drainage by way of Chicago. But the falls were then cutting through the ridge, and when this was accomplished, before the change of drainage was completed, the surface of Lake Erie was suddenly lowered by many feet, and thus the falls were reestablished for some time longer.

Slowly, year by year, one sees the cataract wearing back and suggesting the time when the river will be turned into a series of rapids; but another silent cause is at work, and one not easily seen—namely, the effects of the changing of level of the earth's crust. From the computations already referred to it was found that for the first twenty-four thousand years of the life of the river only the Erie waters flowed by way of the Niagara River, and for only eight thousand years have all the waters of the upper lakes been feeding the falls. If the terrestrial movements continue as at present, and there appears no reason to doubt it, for the continent was formerly vastly higher than now, then in about five thousand years the rim of the Erie basin promises to be raised so high that all the waters of the upper lakes will flow out by way of the Chicago Canal.

Thus the duration of Niagara Falls will have continued about thirty-seven thousand years. But the lakes will endure beyond the calculations of the boldest horologist. —Appleton's Popular Science Monthly.

Bucklen's Arnica Salve.

The Best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by C. E. Holt.

Extension to be Built Without Delay.

Yesterday the engineering corps of the North Carolina Midland located a new line for the Mocksville road, beginning at the switch and extending beyond Davis' school, a distance of 4,600 feet. The change will not only straighten the road, but will be a big improvement in the matter of grade.

The engineers will go down the Greensboro line to-day with a view to making some improvements in the grade by making slight changes.

A reporter learns from reliable sources that it is the purpose of the company to put the line from Greensboro to Mocksville in such a condition that a train of forty cars can be taken over it with one engine as easily as over any line in the State. From the same source it is learned that actual work will begin on the Mocksville extension within the next sixty days.—Winston Journal, 9th.

PROTECT YOURSELF AGAINST SICKNESS and suffering by keeping your blood rich and pure with Hood's Sarsaparilla. Weak, thin, impure blood is sure to result in disease.

Hood's PILLS are easy to take, easy to operate. Cure Indigestion, biliousness, etc.

Southern Cotton Spinners Limit the Output of Cotton Yarns.

CHARLOTTE, June 10.—The Southern Cotton Spinners' Association, in session here, this afternoon entered into a binding agreement to curtail the output of cotton yarns in the South by reducing the time of running to ten hours, beginning June 15th. Prominent railroad officials were here, and have given the mill men concessions in freight rates on raw cotton and yarns and the association is endeavoring to reduce commission charges for the sale of yarns.

The manufacturers present today represented 250,000 spindles. The association controls 400,000 spindles.

One of Dr. Pierce's Pleasant Pellets is a laxative. Two are mildly cathartic. One taken after dinner insures perfect digestion, sound sleep and an absence of foul breath in the morning. You do not become a slave to their use. They not only afford temporary relief, but effect a permanent cure. Once used they are always in favor.

The steamship Empress of Japan, which arrived at Victoria, B. C., from China, reports that 500 Chinese fishermen were drowned in a terrific storm on May 6.

Why will you buy bitter nauseating tonics when Grove's Tasteless Chill Tonic is as pleasant as Lemon Syrup. Your druggist is authorized to refund the money if you are not satisfied.

THE HON. WM. MCKINLEY

In his inaugural address said that the first thing to be done was to protect American industries, and his first step to this end would be to call an extra session of Congress to enact protective laws. He further stated that under these protective laws Woolens would advance 35 per cent.

What We Want to Say

To you is that woolens in the past week have already advanced 15 per cent, with every indication that they will soon reach 35 per cent. We have a few nice OVERCOATS and WINTER WEIGHT SUITS that were bought last fall when woolen goods were lower than they probably ever will be again. We propose to give our customers an opportunity to make a 50 per cent. investment. This is what you can make if you buy winter goods now. You may say this is the wrong season to advertise winter goods. It is not the season you are interested in. It is the opportunity to save 50 cents on the dollar. These are facts, not fancy.

OUR SPRING LINE is complete and prices at the bottom. Druid Hill Shirts, 65 cents.

Salesmen: John W. Crawford, Will. H. Rees, Will. H. Matthews, Frank Brooks and The Mascot.

THE GRAND JURY'S REPORT.

Praise for the County Home and its Management—Caustic Criticism of the County Jail.

Following is the full text of the Grand Jury's Report as unanimously adopted and submitted to His Honor, Judge Allen, at the present term of the Superior court for the county of Guilford:

We, the grand jurors for this honorable court, beg leave to present the following report: We have endeavored to discharge all the duties mentioned in your Honor's charge to the best of our knowledge and ability. We have inspected each office of the county officers and find them decent and in order. As your Honor suggested we visited the home of the aged and infirm. It is located about three miles east of Greensboro on the county road leading to Raleigh and about one hundred yards from the N. C. railroad. It stands on an eminence in a beautiful grove of natural oaks. The main buildings are of brick with stuccoed walls, with a high porch fronting the railroad, which has columns of the Doric order of architecture. Inquiries have been made by thousands of passengers what this building was designed for, and were surprised to learn that it was what was once called the poor house of Guilford county. It was designed and constructed under the supervision of the great Gov. John M. Morehead, of Guilford county. Many people at that time thought it was a useless expenditure of the public money, and called it "Morehead's Palace."

The old Governor was one of the most practical, broad-gauged men of his day and generation, and always knew a good thing when he saw it. Everybody has long since learned that the Governor was right and have risen up en masse and called his name blessed. The present keeper is familiarly known as Gus Voss, and from the appearance of all the surroundings we arrived at the conclusion that he is the right man in the right place.

There were about forty inmates, two of whom have since died. On inquiry from many we learned that they were all well fed and clothed and kindly treated. We also visited the county jail, and now the scene changes.

We attach no blame to the present keeper—we believe he gives the prisoners all the comforts he can under the circumstances, but we were bound to conclude that the circumstances are bad. When we take into consideration the fact that county jails are no longer intended for the punishment of criminals, but only for the purpose of keeping those charged with crime who are refused bail or cannot give it until it can be ascertained whether they are guilty or not, we are bound to arrive at the conclusion that the present jail of Guilford county is a reproach on the civilization of the present age.

We ask your Honor to temper with mercy your judgments on those defendants for trying to escape. We think the instincts of nature for self-preservation a sufficient cause for any one to try to escape from one of the cells where the attempt was made. We make no presentment against any one for the condition of the jail for the reason that it is hard to tell exactly who is responsible. The former board of county commissioners realized the condition and tried to remedy it, but they were handicapped by the board of magistrates. When

ever any measure pertaining to finance was introduced before this board, about half a dozen of these distinguished justices who thought they felt the weight of the government on their shoulders and that they were the watch-dogs of the treasury were apt to defeat any measure that they thought would touch their pockets.

The present board of county commissioners have been in but a short time and as this magisterial handicap has been removed we expect improvements all along this line. Under one corner of this jail there is a dark room (if we may be allowed to call it a room) that we think would compare favorably with what historians have been pleased to call the "Black Hole of Calcutta," which has become a by-word throughout christendom. Those who have not been in think it has not been free from vermin in ten years. This room is used by the municipal government of the city of Greensboro as a calaboose to lock up men and women who are arrested by police officers charged with crime. Sometimes they have to remain twenty-four hours before they can get a hearing to ascertain whether they are guilty or not. It sometimes turns out that they are not, and then their anger is greatly kindled against the city and they wonder what has become of that great liberty that they have heard Fourth of July orators talk so much about, when a man or a woman can be arrested in this free country without a warrant and locked up in a lousy dungeon twenty-four hours and then taken before the mayor of the city and politely informed that they have committed no crime. It requires some time for them to settle in their own minds exactly what to do about it. Now this may sound to your Honor a little romantic but they are ugly facts, as we are informed and believe. We make no presentment against anyone for this state of affairs, for the reason that they have been going on so long that they have become a part of the common law of the city. We call public attention to them, believing that the new board of city aldermen will at least try to remedy some of the evils. We think the county jail ought to be removed from its present location for several reasons. One is that it stands near one of the most public streets in the city, and ladies, gentlemen and children frequently hear from the inmates, who have access to the windows, both profanity and vulgarity. We are informed that a short time ago some ladies were walking this street with flowers in their hands, when they were called to from the windows of the jail and invited to send up a bunch and it would be deposited in a vessel that we have never before heard of as being used as a flower vase. Now these are some of the reasons why we think the jail ought to be removed.

We have discharged all the duties that have been assigned us and now await your Honor's pleasure.

J. M. WOLFE,

Foreman of grand jury.

Death of Stephen A. Douglas' Sister.

CLINTON SPRINGS, N. Y., June 8.—Mrs. Sarah A. Granger, widow of Julian N. Granger and sister of Stephen A. Douglas, the Democratic leader of the ante bellum days, died at her home, near this village, to-day. She was eighty-six years old. Mrs. Granger was postmistress here under President Arthur.

a student at the Western Maryland Col-
lege, Westminster, Md., the past year,
writes that he will work with the Mary-
land Tract Society during vacation in-
stead of coming home.

Mr. D. A. Lundy, of the Southern
Railway passenger depot force, was
robbed of a quantity of clothing one
day last week by a man who boarded
where he does. No trace has been
found of the thief or the clothes.

This is the season of the year when
many of our country readers can settle
their indebtedness to this paper with
products of the farm, which are as ac-
ceptable as cash. We would be pleased
to confer with them in regard to this
matter.

At a meeting of the board of alder-
men last Friday evening Mr. A. M.
Scales was unanimously chosen city at-
torney. It will be remembered that he
resigned this same position when called
upon to represent this county in the
State Senate.

The High Point Coffin and Casket
Company has been incorporated by
Messrs. J. J. Welch, J. A. Lindsay and
R. A. Wheeler, with a capital stock of
\$10,000, with the privilege of increasing
to \$50,000. A factory will be put in
operation at once.

Armfield, Ridge & Vickory an-
nounce to our readers that they have
made deep cuts in several lines of their
goods. They offer a lot of remnants
for less than cost. Call and see what
inducements they are offering their
friends this month.

Dr. Benbow is fitting up an office
in the old Benbow Hall, on South Elm.
Since the building has been repaired it
will probably support the weight of
three or four men without danger of
collapsing. Col. J. D. Kase will also
have his office in the hall.

Wanted.—Three energetic sales-
men at once to travel Guilford, Ran-
dolph, Alamance and Davidson counties
who can furnish horse and a small
honesty bond. Experience unneces-
sary. Address THE SINGER MANUFAC-
TURING CO., Greensboro, N. C. 24-46.

The Johnson harvesters and mow-
ing machines are the best and lightest
running machines in the market. Sold
by the Crutcher Hardware Co. They
also carry a full line of farming im-
plements, in addition to stock of general
hardware. Store opposite water tower.

The Summer School, University of
North Carolina, opens at Chapel Hill
next Tuesday, June 22 and continues
five weeks. Some of the leading school-
men of America are among the instruc-
tors. Tuition \$6.00. Board and room
\$10 to \$15 per month. Special railroad
rates.

Messrs. E. G. Newcomb, B. F.
Fisher, J. R. Coble, R. P. Gorrell, E.
M. Fields, S. J. McCauley, J. D. Oak-
ley, E. G. West and J. E. DeLorme
have applied for liquor dealers' licenses
for the coming year. Mr. DeLorme
contemplates opening a bar in the new
Callum building, on South Elm street.

The world did not come to an end
last Saturday, as predicted by a colored
preacher on in Indiana who had fixed
the exact date of that event by mathe-
matical calculations, consequently we
are still here waiting on some of our
delinquent subscribers who are long on
promises and short on fulfillment
thereof.

We call special attention to the
excursion advertised in another col-
umn, to be run from this city to Char-
lotte Thursday, June 24th, by the West-
minster and Friends Sunday schools.
This is an excellent opportunity for
persons who desire to visit the "Queen
City," the fare being within the reach
of everyone.

Col. W. S. Rankin is in a brown
study these days. He is undecided as
to what he shall do with his vacant lot
on North Davis street after the grad-
ing on that thoroughfare is completed.
Some of his friends want him to estab-
lish a bathing beach but he is more in-
clined to embark in fish culture and
duck raising.

Rev. John R. Brooks, D. D., pre-
siding elder of the Charlotte district,
spent Sunday here with his son, Dr.
W. H. Brooks. He preached two ex-
cellent sermons during the day, at
West Market in the morning and Cen-
tenary in the evening. His old and
new friends never miss an opportunity
of hearing him.

Two prominent Greensboro gentle-
men were "doctored" last week while
in the enjoyment of the best of health,
Trinity College conferring the degree
of Doctor of Divinity on Editor T. N.
Ivey, of North Carolina Christian Ad-
vocate, and Doctor of Literature on
President Peacock, of the Greensboro
Female College.

Wanted.—We desire a young or
middle aged man of good executive
ability to represent us in Guilford
county, and to be able to travel after
the first month. Salary and expenses.
Give definite local references, age, and
former occupation, if any. Address
J. H. MOORE CO., 216 South Third Street,
Philadelphia, Pa.

Oak Ridge Institute will open its
40th year August 18th. The school has
been managed by Prof. Holt, twenty-
two years, and in the language of Dr.
Winston, recently president of the
University, "has had a very large share
in the revival of the educational spirit
in the state." It sends out the pretti-
est catalogue in the state. Write for
one.

Mr. N. N. Osburn, well known at
Woodstock, Mich., was troubled with a
lame back. He was persuaded to use
Chamberlain's Pain Balm. It gave him
relief in one night. This remedy is
also famous for its cures of rheumatism.
For sale by Richardson & Fariss, Drug-
gist.

We have a number of testimonials
from mothers in Greensboro and sur-
rounding towns who say that nothing
relieves their children of whooping
cough as quickly and permanently as
Goose Grease Liniment. It stops a
hard spell of coughing at once and
prevents a return. Satisfaction guaran-
teed.

Mrs. S. W. Crowder, an excellent
young woman of Madison township,
died recently of consumption after an
illness of about three months and was
buried at Friendship church. A hus-
band and five children survive her.
She was a devout christian, a member
of the Methodist Protestant church
and much beloved by a large circle of
friends.

Court is in session again this week,
Judge Allen having sufficiently re-
covered from his recent illness to proceed.
The criminal docket is as yet unfin-
ished. Today Will Hainston and Miller
Lee are being tried on the charge of
rape, the evidence being of the most
damaging character. Very little if
anything can be done with the civil
docket at this time.

Messrs. T. W. Wood & Sons, the
Richmond seedsmen, are again rep-
resented in our advertising columns.
Most of our readers are familiar with
this firm, it having an established repu-
tation throughout the South. Just now
they are pushing their turnip seed,
which yield both quality and quantity
unexcelled. No one is ever disappointed
in Wood's seeds. Try them this
year, by all means.

In order to thoroughly advertise
their business and also convert occa-
sional customers into regular ones,
Thacker & Brockmann have adopted a
somewhat novel plan. They propose
to give away with each purchase
glassware, china, rugs, curtains, &c.,
every customer buying ten dollars
worth or more being entitled to one of
the premiums. Read their announce-
ment on this page. It may prove both
interesting and profitable.

Ordinarily a grand jury's report
abounds in stereotyped phrases regard-
ing the conditions of the various pub-
lic interests over which that body ex-
ercises guardianship, but there is a
startling departure from established
customs in the report submitted by the
jury which served at the beginning of
the present term of court. The county
jail, long inadequate to its require-
ments and utterly unsanitary, is
rightfully condemned in strong terms
and attention called to the fact that
there must be a change made at once.
The county commissioners are called
upon to meet a condition, not a theory,
and they may as well toe the scratch
with good grace.

"They are dandies," said Thos. Bowers,
of the Crook, Texas Enterprise, while
writing about DeWitt's Little Early
Risers, the famous little pills for sick
headache and disorders of the stomach
and liver. Howard Gardner.

Battle Ground Celebration.
Everything is in readiness for the big
annual celebration at Guilford Battle
Ground to be held Saturday July 3rd,
the 4th coming on Sunday. The lead-
ing features of the celebration this year
will be the unveiling of the magnificent
statue of William Hooper, recently
erected over the graves of William
Hooper and John Penn, two of North
Carolina's signers of the Declaration
of Independence. Also the new fire-
proof museum is to be dedicated to its
uses of preserving the valuable relics
of our Revolutionary fathers. Jos. M.
Morehead has kindly consented to de-
liver the annual oration, taking for his
subject the "Life and Times of James
Hunter." Our Senators and Repre-
sentative in Congress, Governor Rus-
sell and other distinguished guests
have been invited to be present and
make short addresses. The usual mar-
tial array and music will not be omitted.
Everybody is invited to participate in
this glorious occasion. The park is in
excellent condition and a day of genu-
ine enjoyment is assured.

Not only piles of the very worst kind
can be cured by DeWitt's Little Early
Risers, but eczema, scalds, burns, bruises,
boils, ulcers and all other skin troubles
can be instantly relieved by the same
remedy. Howard Gardner.

Dowd's Life of Vance.
The Patriot has just become the
owner of Dowd's Life of Vance. We
deem it hardly necessary to say to the
people of Guilford that this superb
work is everywhere meeting the ex-
pectation of those who have so im-
patiently awaited its publication. The
work has emanated from a mind thor-
oughly competent to the task of pre-
serving to the people a completed his-
tory of a great man from early child-
hood to the end of his eventful life.
Indeed Maj. Dowd is perhaps the only
man who could have prepared this book.
His long association with Vance in the
practice of the law, his intimacy with
the family gave him opportunity to
know Vance better than any other
North Carolinian.

In the details of the book Maj. Dowd
has been ably assisted by Gen. R. B.
Vance, Dr. Kemp Battle, Dr. Price, Dr.
Melver, and others. The hitherto un-
published lectures and speeches to-
gether with the famous correspondence
between Gov. Vance and President
Davis will be intensely interesting to
the old soldier while they will tend to
promote the patriotism of the young
men by placing before them the un-
paralleled devotion of her greatest son
to a determination of purpose that
could alone proceed from a true and
loyal heart.

The book is truly an interesting and
instructive work. It cannot but prove
an inspiration to future generations of
our State. Gov. Vance was in deed and
in truth a great man. Let the people
evidence their love for the great leader
by placing a copy of "The Life of
Vance" in their library.

The mechanical work is being done
by the Charlotte Observer and like all
work from that office it is first class in
every respect. The price of the book is
very reasonable and leaves all who wish
the work without excuse.

Mr. J. B. Baird, of Charlotte, has the
exclusive sale in Guilford county. See
him or write him at Greensboro and
secure a copy.

W. B. Johnson, Newark, O., says:
"One Minute Cough Cure saved my
only child from dying by croup." It
has saved thousands of others suffering
from croup, pneumonia, bronchitis and
other serious throat and lung troubles.
Howard Gardner.

FREE!
ABSOLUTELY FREE OF CHARGE.
