MIDWEST REGION - CHICAGO, IL
MARCH, 1987

ASERL

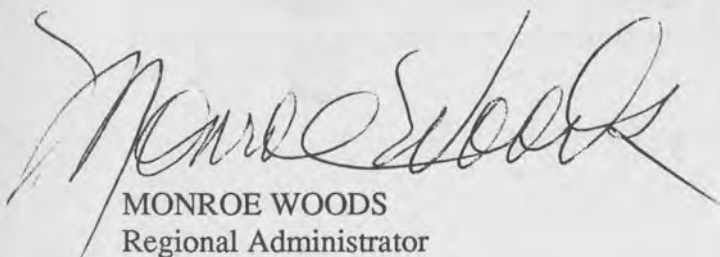

FOOD AND NUTRITION SERVICE

The Food and Nutrition Service (FNS) of the U. S. Department of Agriculture is the Federal Agency responsible for administering all food assistance programs. Established August 8, 1969, the FNS mission is to provide needy persons with access to a more nutritious diet, to improve the eating habits of the nation's children and help strengthen the agricultural markets for products produced by American farmers. To accomplish this mission, the agency operates the Food Stamp Program; Child Nutrition Programs including the National School Lunch, Breakfast, Child Care Food Program and Summer Food Service Programs; various Food Distribution Programs and Supplemental Food Programs for Women, Infants and Children.

The FNS Midwest Regional Office administers these food assistance programs through the appropriate state agencies - the education, welfare, and health agencies of each state government. A list of program administrators for each midwest state begins on page 17.

Located in Chicago, the Midwest Regional Office has responsibility for the food assistance programs in Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. Agency objectives are: (1) target benefits to those most in need; (2) improve program administration; (3) improve state and local program operation; (4) improve program integrity; and (5) improve the operating effectiveness of FNS. This booklet provides a brief summary of the programs administered by FNS. Further information can be obtained by contacting:

MILLIONS (1,000,000) OF DOLLARS

FOOD STAMP PROGRAM

The Food Stamp Program helps low-income households purchase more food for a more nutritious diet. Participating families get coupons free of charge, which they exchange for food at authorized stores.

Today's Food Stamp Program stems from the assistance programs of the Great Depression when farmers were burdened with foods they could not sell, while thousands stood in breadlines, waiting for something to eat. As an enhancement to the Food Stamp Plan of the late 1930's, a permanent Food Stamp Program was established in 1964 for States wishing to take part.

Under agreement with FNS, state public assistance agencies administer the program through their local offices, which certify eligible households and issue benefits to them. FNS develops program policies and procedures, and pays for 100 percent of food stamp benefits and at least 50 percent of state agency administrative costs. Program operations are monitored through a Federal and State performance reporting system that includes periodic management evaluations and continuous quality control reviews.

To qualify for food stamps, households must have net incomes, after deductions, that fall at or below the Office of Management and Budget non-farm poverty guidelines. Household assets must fall below certain limits and household members must meet work registration requirements. Only U.S. citizens, legally permanent aliens, and other aliens may qualify.

The Midwest Region ranks number one in the nation with nearly \$200 million in food stamps issued monthly. Two midwest states, Illinois and Ohio, have ranked in the top five states nationwide for issuance and program participation during the past few years. The average benefit per person in the region was \$48.50 in 1986.

CHILD NUTRITION PROGRAMS

Five separate child nutrition programs are administered by FNS: The National School Lunch Program, School Breakfast Program, Child Care Food Program, Summer Food Service Program for Children, and Special Milk Program for Children. All are dedicated to the health and well-being of the nation's children. In most instances State educational agencies administer the programs. The Federal government provides cash and food assistance to the states for those schools and child care institutions which meet the requirements of the individual programs.

NATIONAL SCHOOL LUNCH

Since 1946, the National School Lunch Program has helped provide nutritious lunches to the nation's school children. Through participating schools and residential child care institutions eligible students receive low-cost meals daily. To participate, eligible schools and institutions must:

- Operate the lunch program for all on a nonprofit basis.
- Serve lunches that meet established nutrition standards.
- Provide free and reduced-price lunches to students unable to pay the full cost based on income eligibility criteria.

Students of families meeting the the Secretary of Agriculture's Income Eligibility Guidelines receive lunches either free or at a reduced price. Schools and institutions receive a basic amount of reimbursement for the number of lunches served and additional reimbursement at special rates for each free and reduced-price lunch served to eligible students. In addition to cash reimbursement, USDA donates commodities for lunches served under the program.

Of the average 3.7 million lunches served daily in the Midwest Region, approximately 34.2 percent are served free and 4.5 percent are served at a reduced price. The Midwest Region has the second highest participation in the School Lunch Program compared to the 6 other regions. Nearly \$526 million was spent last year for school lunches in the Midwest Region.

SCHOOL BREAKFAST PROGRAM

Established in 1966, the School Breakfast Program offers children a nutritious breakfast prepared at school. The program is especially important in improving students' diets since many children come to school without eating breakfast. Studies have shown a direct correlation between good nutrition and performance in school. Like the School Lunch Program, the breakfast program is available to eligible schools and residential child care institutions. The same criteria for establishing the school lunch program applies for the breakfast program.

An average of 271,000 breakfasts were served daily at a cost of over \$36 million during FY'86 in the Midwest Region. Of the total number served, approximately 90.4 percent were served free, 2.1 percent were served at a reduced price, and 7.5 percent were paid in full by students.

SPECIAL MILK PROGRAM

The Special Milk Program for Children makes it possible for all children attending a participating school or institution to purchase milk at a reduced price or receive it free, if they are eligible. Reimbursement is provided for each half-pint of milk served under the program. Schools and institutions that participate in other Federal/State child nutrition programs may not participate in the Special Milk Program for Children. More than 71 million half-pints of milk were served to school children in the Midwest at a cost of more than \$6.5 million in 1986.

CHILD CARE FOOD PROGRAM

Child care facilities and institutions are able to serve nutritious meals and snacks to pre-school and some schoolage children through the Child Care Food Program. The program operates in nonresidential day-care centers, outside-school-hours care centers, institutions providing day-care for handicapped children and family day-care homes. Participating facilities and institutions get cash reimbursement, USDA donated foods, and technical assistance from FNS and state agencies. In child care centers, the amount of cash reimbursement varies according to the family size and income. The amount of cash reimbursement is based on a food service payment rate in day care homes. In the Midwest, nearly \$87 million was spent during 1986 for more than 123 million meals to children in child care facilities.

SUMMER FOOD SERVICE PROGRAM

The Summer Food Service Program for Children helps communities serve meals to needy children when school is not in session. The program is sponsored by public or private nonprofit school food authorities or local, municipal, county or state governments. Public or private nonprofit residential camps also may be sponsors.

The program operates in residential camps and in areas where at least 50 percent of the children served by the site meet the income criteria for free and reduced-price school meals. USDA reimburses sponsors for operating costs of food services up to a specified maximum rate for each meal served. In addition, sponsors receive some reimbursement for planning, administrative and supervision expenses. In the Midwest, nearly 9.2 million summer meals were served at a cost of \$13.8 million in 1986.

SUPPLEMENTAL FOOD PROGRAMS

SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC)

The WIC Program provides nutritious food supplements and nutrition education to pregnant, breastfeeding, and postpartum women, as well as to infants and children up to their fifth birthday. WIC is operated by local health clinics and other authorized health facilities. WIC benefits are currently provided by approximately 5,800 clinics throughout the country.

To qualify, mothers and children must be individually certified to be at "nutritional risk" because of medical or nutritional need and inadequate income. Each participating mother or child receives individually prescribed packages of foods high in protein, iron, calcium, vitamin A and vitamin C.

Depending on the age and nutritional needs of the woman, infant, or child, the package includes such foods as iron-fortified cereal and infant formula, eggs, juice, milk, cheese, peanut butter or dry beans or peas. Participants receive nutrition education along with the supplemental foods.

WIC clinics provide supplemental foods in one of three ways. Clinics obtain foods from local firms and distribute it directly, arrange for home delivery or give vouchers to mothers for specified items at authorized grocery stores. Most clinics give participants vouchers.

During each month in FY'86 nearly 123,000 women, 178,000 infants, and 340,000 children participated in the WIC program in the Midwest Region. The total food cost for the region's program was approximately \$211 million and the administrative costs totaled over \$54 million. The average food cost per person for the WIC program in the Midwest Region for FY'86 was \$27.47.

COMMODITY SUPPLEMENTAL FOOD PROGRAM

The Commodity Supplemental Food Program (CSFP) distributes USDA-donated foods to low-income women and children certified by participating local agencies. Those eligible include infants, children up to age 6, and pregnant, breastfeeding or postpartum women vulnerable to malnutrition who are not already receiving WIC benefits.

To participate in the CSFP, women and children must qualify for benefits under an existing Federal, State, or local food, health or welfare program for low-income people. Some state agencies also require that participants be at nutritional risk as determined by a doctor or staff person at the local agency.

Participating women and children are given prescribed food items, which they pick up at a distribution facility. They also receive instruction on how to prepare the foods and practical lessons on nutrition. The CSFP is currently operated at 29 sites in 13 states and the District of Columbia. Focus:HOPE in Detroit and Catholic Charities in Chicago currently operate CSFP programs. Focus:HOPE also operates an Elderly Feeding Project.

FOOD DISTRIBUTION PROGRAMS

Through the Food Distribution Program, USDA purchases surplus foods from U.S. markets and distributes it to State agencies for use by eligible local agencies.

The food is distributed to schools and institutions participating in the child nutrition programs, to nutrition programs for the elderly, to needy families on Indian reservations, and to hospitals and prisons. The food is also given to victims of natural disasters. Currently schools get approximately 70 percent of the foods donated by USDA.

CHARITABLE INSTITUTION PROGRAM

The Midwest Region leads the nation in the number of charitable institutions participating in the Food Distribution Program. Over \$38 million of commodities were served to the needy at charitable institutions in the Midwest Region in FY'86.

TEMPORARY EMERGENCY FOOD ASSISTANCE PROGRAM (TEFAP)

TEFAP gives needy Americans, including low-income and unemployed persons, USDA-donated foods for household use. The program was established in December 1981 as a means to distribute the growing government inventories of dairy products acquired under the dairy price support program. It has been reauthorized through September 1988.

The food distributed is free, but recipients must meet certain eligibility criteria established separately by each of the States. Since the inception of the program more than 3.5 billion pounds of food commodities have been provided through State and local agencies at a cost of over \$4 billion. Nationally USDA distributed more than \$846 million worth of surplus food through TEFAP in FY'86.

The Midwest Region has the largest TEFAP in the nation. Nearly \$177 million worth of commodities were distributed in 1986 in the Midwest Region. Over 230 distribution network agencies or food banks distributed TEFAP commodities through about 7,500 distribution sites.

FOOD DISTRIBUTION ON INDIAN RESERVATIONS

The Food Stamp Act of 1977 gives Indian households located on or near a Federally recognized reservation the option of participating in either the Food Distribution Program or the Food Stamp Program. The Food Distribution Program is administered on reservations by the state's distributing agency or by the Indian Tribal Organization (ITO). In instances where both the Food Stamp and Food Distribution Programs operate on the same reservation, households cannot participate in both programs at the same time.

Like the Food Stamp Program, the Food Distribution Program for Indian Reservations has means-tested eligibility requirements. Eligible households receive a monthly packet of food from the four basic food groups. The amount of food is based on the household's size. Cheese, butter, dry and canned milk, flour, macaroni, canned vegetables and meats, peanut butter and dry beans are some of the foods available in the program. Members of tribes participating in the program are also taught nutrition, food storage techniques and sanitary ways to prepare food.

The Midwest Region is the second largest region in the nation in terms of the number of Indian Tribal Organizations participating in the Food Distribution Program on Indian Reservations. There are 22 ITO's within the participating states of Michigan, Minnesota and Wisconsin. Approximately 16,000 needy persons will be served each month by this program during 1987 in the Midwest Region.

NUTRITION PROGRAMS FOR THE ELDERLY

The Food Distribution Program also serves elderly Americans through the National Nutrition Services for the Elderly Program of the U.S. Department of Health and Human Services (HHS). The Older Americans Act of 1965, as amended, provides for social services and nutritious meals for elderly people. HHS gives grants to state agencies which designate area agencies on aging to plan and coordinate the nutrition program through local providers.

The state agencies on aging may request USDA donated foods, cash in lieu of foods, or a combination of both to use in providing meals to the elderly at various sites. The amount of food or cash that USDA gives each state is based on the number of meals served in the program and the level of assistance per meal authorized by legislation. People over 60 years of age and their spouses, regardless of age, may participate in the program.

The Midwest Region's Nutrition Program for the Elderly has the largest entitlement of all FNS regions with over \$24 million in FY'86. More than 40 million meals were served to elderly in the Midwest Region during FY'86.

DISASTER FOOD ASSISTANCE

Whenever disaster strikes and a request for food assistance is received and approved, the Food and Nutrition Service and its cooperating agencies are on the scene.

At the outset of an emergency, disaster relief organizations -- such as the Red Cross or Salvation Army -- initially set up shelter locations. Depending on the extent of the disaster, the shelters serve as feeding or housing sites for victims. The relief organization, using its own food supplies, sets up kitchens or conducts mass feeding out of canteens. The organization may then approach the state food distribution agency and request USDA donated foods. The types of food dispensed depend on the site cooking facilities and the needs of the relief organization.

The USDA foods are generally diverted from stocks used to feed children in the National School Lunch Program. Sometimes, however, the food comes from supplies earmarked for other food assistance programs.

Emergency food stamps may also be issued in disaster situations such as fire, hurricane, tornado, flood, storm or other severe catastrophe. Such emergency assistance is approved only if commercial food outlets are still available for food stamp users and if the normal, ongoing Food Stamp Program cannot handle the influx of applications for assistance. Simplified certification procedures are used when emergency food stamps are authorized.

Whether food assistance in disasters is provided in the form of food stamps or USDA-donated foods, Food and Nutrition Service personnel go wherever they are needed to help state and local agencies with relief activities.

NUTRITION EDUCATION TRAINING

Nutrition Education Training (NET) efforts are designed to provide nutrition education information for children, teachers and food service personnel. The Regional NET coordinator advises the state agencies regarding federally mandated meal patterns required to operate child nutrition programs. The regional NET coordinator also provides information and advice about the "Make Your Food Dollars Count" project, which encourages low-income consumers to shop wisely for food in terms of nutrition and value.

Under the Nutrition Education and Training Program, funds are granted to the States for dissemination of nutrition information. The program goals are:

- To encourage good eating habits and teach the relationship
- To train food service personnel in nutrition and food service management and to encourage the use of the cafeteria as an environment for learning about food and nutrition; -
- To instruct educators in nutrition education and in the use of the cafeteria as a learning laboratory and
- To develop appropriate educational materials and curriculum.
