SCHOOL FOOD PURCHASE STUDY FINAL REPORT

October 1998

Enclosed, for your information, is the *School Food Purchase Study: Final Report*. This report provides national estimates of food acquisitions made by public schools participating in the National School Lunch Program (NSLP) and School Breakfast Program (SBP). It describes the type, quantity, and value of foods purchased directly by public school districts and the relative importance of foods donated by the U.S. Department of Agriculture (USDA). The study also examines procurement practices and operating characteristics of these school districts and their relationship to food costs. Data were collected from a nationally representative sample of 324 unified public school districts during School Year 1996/97. Findings are compared to the results of a similar study conducted by USDA in School Year 1984/85.

If you have any questions regarding this report, please contact John R. Endahl, Project Director, Office of Analysis, Nutrition, and Evaluation, at (703) 305-2122.

STATISTICAL APPENDIX

Introduction

This is a companion volume to the Draft Final Report of the School Food Purchase Study. It consists of tables containing national estimates of foods acquired by public unified school districts participating in the National School Lunch Program (NSLP) in SY 1996/97. The methodology used in the derivation of these estimates is described in Chapter II of the Draft Final Report.

These tables provide information for approximately 842 individual food items. Each item is identified by food code and by name. School District food acquisitions are assigned to one of three categories: purchased foods, processed foods containing donated commodities, or donated commodities. Most of these tables provide values for each of these categories plus total acquisitions.

The following tables appear in this Appendix:

- **Table I: Individual Food Code Classification System** – This table describes the classification system used in developing the six-digit food codes that were assigned to individual food items.
- **Table II: Assignment of Individual Food Items to Food Groups and Subgroups** – This table identifies the food group and subgroups to which each of the individual food items are assigned for purposes of data aggregation. There are 16 food groups and 67 subgroups.
- **Table III: Total Estimated Value of Individual Foods Acquired by Public Unified NSLP School Districts, SY 1996/97** – This table provides the dollar value of individual food item acquisitions. Donated commodities and processed foods containing donated commodities are valued at commercial values, not at USDA-assigned values. Totals appear at the end of the table.
- **Table IV: Total Estimated Weight in Pounds of Individual Foods Acquired by Public Unified NSLP School Districts, SY 1996/97** – This table provides the weight in pounds of individual food item acquisitions. Weights are net product weight in the form described. Totals appear at the end of the table.

- **Table V: Comparison of Total Estimated Weight in Pounds of Individual Foods Acquired by Public Unified NSLP School Districts, SYs 1984/85 and 1996/97** – This table provides comparative information for 1984/85 and 1996/97 on the volume of acquired foods. Since these studies were conducted using somewhat different food names and different coding systems, it was necessary to match the two series to prepare this table. While most foods could be readily matched, some judgements were required. As a result, comparisons at the individual food item level should be approached with caution.
- **Table VI: Number of Public Unified NSLP School Districts Reporting the Acquisition of Individual Food Items, SY 1996/97** – This table provides national estimates of the number of public unified school districts acquiring individual food items in SY 1996/97. To the extent individual food items are highly seasonal in their availability or, as in the case of some donated commodities, are only distributed during parts of the year, these estimates might underestimate the true values.
- **Table VII: Mean Cost Per Pound of Food Items Purchased by Public Unified NSLP School Districts, SY 1996/97** – This table provides the mean per pound price paid for commercially purchased food items by school districts that purchased the item. It should be noted that all values assigned to processed foods containing donated commodities are based on commercial prices paid for comparable purchased foods. In effect, they are “shadow prices” of the prices paid for purchased foods. Differences between the two are therefore due to locational differences rather than to differences between purchased foods and processed food containing donated commodities.
- **Table VIII: Value Per Thousand Students of Food Items Acquired by Public Unified NSLP School Districts, SY 1996/97** – This table estimates the annual acquisition value of each individual food item for every thousand students having access to the NSLP in SY 1996/97. Those students enrolled in NSLP schools but not having access to school meals were excluded from the calculation.
- **Table IX: Comparison of the Share of Public Unified NSLP School Districts Reporting the Acquisition of Individual Food Items, SYs 1984/85 and 1996/97** – This table compares the share of all school districts acquiring individual food items in 1984/85 and 1996/97. The 1996/97 percentages are based on the number of districts reported in Table VI.

Table I: Individual Food Code Classification System

Each food item identified in the study was assigned a unique six-digit food code. The code numbers were developed using the following classification system.

Digit	Item
1	general category (e.g. fruit)
2 and 3	subcategories (e.g. peaches)
4	specific characteristics (e.g. peaches in heavy syrup)
5	form (e.g. canned)
6	check digit

Classification System by Digit

**General Category
(first digit)**

1 – meat and meat substitutes	4 – grains and oilseeds	7 – soup
2 – fruit	5 – dairy	8 – sauces
3 – vegetables	6 – sugar	9 – mixed entrees/other beverages

**Subcategories
(second and third digits)**

Meats and meat substitutes

00 – fish/shellfish	30 – vegetarian products	60 – pork
10 – dry beans	40 – beef	70 – turkey
20 – eggs	50 – chicken	80 – other meats
		90 – mixed meats

Fruit

00 – apples	24 – grapes	38 – pears
02 – apricots	25 – jicama	40 – pineapple
03 – avocado	26 – kiwi/kumquats	42 – plums
04 – bananas	27 – lemons	43 – prunes
05 – blackberries	28 – limes	45 – raisins
06 – blueberries	29 – mango	46 – raspberries
10 – cherries	30 – mango	47 – rhubarb
11 – coconut	31 – mineola	50 – starfruit
12 – cranberry	32 – nectarine	51 – strawberries
14 – dates	33 – oranges	52 – tangelo
16 – figs	34 – peaches	53 – tangerine
22 – grapefruit	36 – papaya	60-65 – mixed fruit and fruit products

Vegetables

00 – asparagus	28 – collards	66 – peppers
01 – artichoke	30 – corn	67 – pimentos
02 – bean sprouts	34 – cukes/pickles	70 – potato (includes chips)
04 – green beans	36 – eggplant	71 – pumpkin
08 – wax beans	38 – kale	72 – radishes
10 – beets	40 – lettuce	73 – rutabaga
14 – broccoli	42 – mushrooms	74 – spinach
16 – brussel sprouts	44 – mustard greens	75 – alfalfa sprouts
18 – cabbage	46 – okra	76 – squash
20 – carrots	47 – olives/olive oil	77 – sweet potato
22 – cauliflower	48 – onions, green	78 – tomato (includes ketchup/salsa)
24 – celery	49 – onions	80 – turnips/parsnips
26 – chard	63 – parsley	82 – water chestnuts
27 – cilantro	64 – peas	83-90 – assorted vegetable products

Grains and oilseeds

10 – corn
20 – oats
30 – rice
40 – soybeans
50 – wheat

60 – peanuts
70 – miscellaneous grains
71 – oils
72 – mayo/dressings
73 – margarine

74 – tartar sauce
75 – pasta salad
76 – nuts
77 – almonds
78 – sunflower/sesame

Mixed entrees/other beverages

91 – prepared sandwiches
92 – prepared meals
99 – water/sport drinks

**Specific Characteristics
(fourth digit)**

This description is unique to each food item.

**Form
(fifth digit)**

1 – fresh
2 – canned

3 – frozen
4 – dry

5 – unknown/irrelevant
6 – individual serving packs

**Check Digit
(sixth digit)**

^{1/} For cells containing a range of values, the first value is the minimum percent of SFAs that acquired the individual food item and the second number represents the maximum percent of SFAs that acquired the food item. These ranges were used because the 1987 Study used more food codes than the 1998 Study and thus individual food items were aggregated to coincide with the 1998 Study's food codes.

^{2/} Less than 0.05 percent

Note: "n/a" indicates that the food description was not used to describe foods acquired in the particular Study period.

Note: Percentages for 1984/85 are based on a 10,866 districts and 1996/97 percentages based on 10,083 districts.
